Fort Worth Sells Them,

If any evidence was needed to prove that Fort Worth would ere long be-come the agricultural implement headquarters for half of Texas, we cou'd furnish it. Already our dealers han die more goods of this class than are sold by any two cities in the state, and the trade is comparatively in its infancy. Fort Worth is located in the heart of the finest spricultural region of the Southwest, and to the Northwest stretches a territory equal in area to two or more states that is being rapidly filled with people.

While yesterday was not an unusual day with J. B. Mitchell & Co., a GA-ZETTE representative took the trouble to note the following goods lying in front of their immense wholesale house, tagged and ready for shipment:
Three portable hay presses, to Gonzales; two hay rakes and two mowers, to Aledo; one horse-power and thresher, to Denton; two hay rakes and one cane mill and evaporator, to Alexander; one smut machine, one cane mill and one mower, to Bowie; besides belting, shafting, pulleys, rake teeth, etc. Mr. J. B. Mitchell stated teeth, etc. Mr. J. B. Mitchell stated to the writer that immense quantities of heavy goods were sold by the house that were shipped direct from the factory to their place of destina-tion without stopping at Fort Worth. Said he: "I have just sold Mesers. E. tes & Nirkirk of Stoney a complete ateam gin outfit, which, of course, will not be unloaded at this place." "How is the implement trade this

"It is astonishing, considering the hard times, and only understood by those who are acquainted with the territory tributary to the city and the rapidity with which it is being developed. Call some afternoon when you are not in such a hurry, and I will give you some cold facts in reference to the trade that will open your eyes.

City or Mexico, July 11 .- The

Mexican Financier this afternoon

says: "The banks continue to discount commercial paper with caution, and coufine their transactions to customers of whom they are sure. In commercial circles credit is given with circumspection, and the disposition of the business men is to curtail operations till the crisis is past. That it is impossible speedily to resume the payment of subsidies to the subventioned corporations is apparent on the most superficial study of the financial situation. The govern-ment must first of all maintain itself. Public order must be sustained if any investments here are to be of any value, and in this light the railroad and other subventioned interests must look at the matter. It would seem to to be a good opportunity for railway companies to effect a compromise with the government, thereby obtaining an extension of the period for the completion of their lines still under construction and an adjustment of the points which are yet under discussion. dicate accepts the new contract, but he has said nothing to indicate that it of friendliness the representatives he had changed his view of the matter as given to a GAZETTE reporter the evening Indiana stone was adopted, to-wit: that he had no prerogative like important for Mexico that the to do otherwise than to concede to the rallroad system already planned and under survey or construction should be built as soon as possible. With this net-work of railroads touching every important point in the country the nu-merical strength of the army could easily be reduced and the treasury correspondingly relieved."
